Thematic Areas

The focus of Expo Milano 2015, **Feeding the Planet, Energy for Life**, will be expressed by means of five **Thematic Areas**. Located close to the main

entrances and other key points around the Exposition site and comprising exhibition routes featuring attractive elements designed to delight adults and

children alike, these areas provide fascinating insights via a host of multi-sensorial and educational experiences.

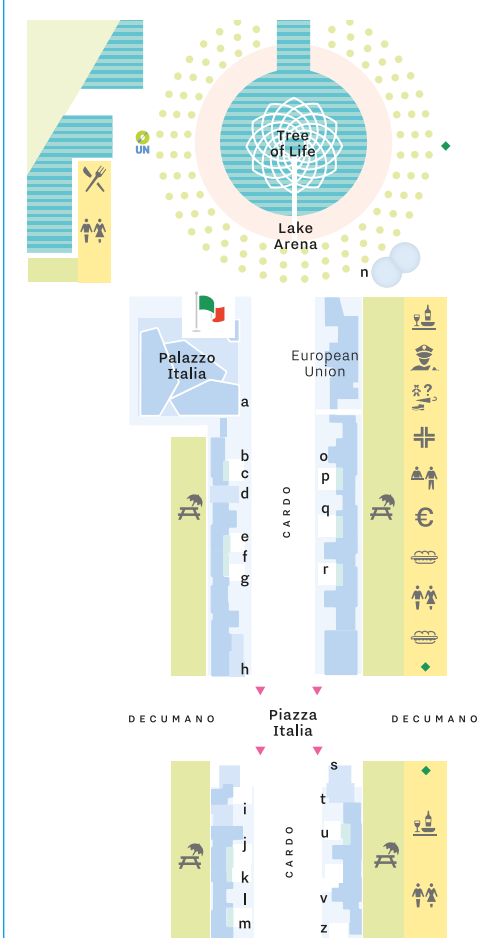

Clusters

Clusters are one of the innovations of Expo Milano 2015. Countries are grouped in collective pavilions based on thematic identities and food chains. This way, the theme

Feeding the Planet, Energy for Life is addressed making the spirit of these spaces concrete, which is precisely aimed at sharing, dialogue and interaction.

Clusters are characterized by common areas that develop through functional spaces (market, exhibition, events, and tastings) of the food chain.

The Cardo – Italian Pavilion

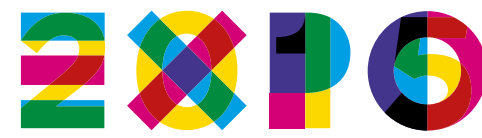

ITALY
The Nursery of Italy

The Italian Pavilion exhibits Italian excellences: culture and national traditions connected with food and nutrition, characterized by the high quality of raw materials and final products.

It includes Palazzo Italia, the four building on the Cardo and the Lake Arena, for a total of 14,000 square metres.
